

1. WINDOW FOCUS & MOVEMENT

Directional (H/J/K/L)

Focus Window / Stack + Hyper + H J K

Focuses W/S/N/E; cycles stack on J/K; crosses displays at edge.

window --focus <dir> || stack.next/prev || di...

Swap Window ^ ⌘ + H J K L

Exchanges window position with neighbor (or moves across displays).

yabai -m window --swap <dir>

Warp into Split ^ ⌘ ⌥ + H J K L

Re-inserts window into neighbor's BSP node, splitting that neighbor.

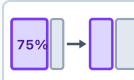

yabai -m window --warp <dir>

Resize Split Divider ^ ⌘ + - / =

Nudges vertical split divider left or right by 20px.

yabai -m window --resize left:±20:0

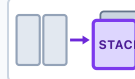

75% Main / 50% Balance + Hyper + S / 0

S gives active window 75% of split; 0 balances all to 50/50.

window --ratio abs:0.75 | space --balance

2. LAYOUT MODES & TRANSFORMS

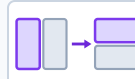

Stack / BSP / Zoom

Toggle Stack / Tiling + Hyper + Space

Switches space between stack (1 fullscreen window) & bsp tiling.

yabai -m space --layout stack | bsp

Flip Split Direction + Hyper + E

Flips current pair between side-by-side and top-to-bottom.

yabai -m window --toggle split

Rotate 90° / Mirror + Hyper + R / Y / X

R rotates 90°; Y mirrors left↔right; X mirrors top↔bottom.

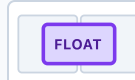

space --rotate 90 | --mirror y-axis | x-axis

Toggle Zoom (Full/Parent) + Hyper + F / D

F maximizes over entire screen; D zooms over parent split.

yabai -m window --toggle zoom-fullscreen | zo...

Float & Center + Hyper + T / C

T floats at 50% center; C floats as 2/3 center column.

yabai -m window --toggle float --grid ...

3. SPACES, MONITORS & RULES

Persistent Labels

Focus Space + Hyper + P N / ← →

Switches active Desktop Space left (P/←) or right (N/→).

space --focus prev/next || skhd -k "ctrl - le...

Move to Space ^ ⌘ + P N / ← →

Moves window to adjacent space (& follows) or space 1..6.

ctrl+alt - P/N or 1..6 : window --space ...

Focus Display 1-3 + Hyper + 1 2 3

Jumps cursor and focus to Center (1), Left (2), or Right (3).

yabai -m display --focus 1..3

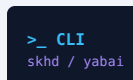

Dynamic Space Labels & Rules

Center: main1..N (bsp) • Sides: left / right (stack)

App rules loaded from

~/config/yabai/local.sh

Undocked (1 screen) auto-switches all spaces ...

CLI Quick Reference

• Observe keys: skhd -o • Reload: skhd -r
• Re-sync spaces/rules: ~/config/yabai/sync-layout.sh
